1. Although the applicant is only given one month to respond to the restriction requirement, the following problems are pointed out in order to promote compact prosecution. The applicant does not have to respond to these issues, but would possibly speed up prosecution if these problems were addressed. There are no figures. All claimed elements must be shown. NO NEW MATTER MAY BE ENTERED. Further, there may be possible 112 first paragraph problems or 101 problems because it is unclear how the signals are supplied with the specific functional language. There are no figures or description of how the signals are supplied. Further, the claims appear to be "single means" (just a stream of pulses). See MPEP 2164.08(a). Also, claims 10-12 appear to contain two statutory classes (means and a method in the same claim – Ex parte Lyell (17USPQ2d 1548, Bd. Pat. App. & Inter. 1990)). See MPEP 2173.05(p), section II.

2. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species I) the embodiment in which each pulse has a constant phase

Species II) the embodiment in which phase varies between beginning of a pulse and the end of a pulse.

Species III) the embodiment in which RZ signals are generated from two interleaved streams of pulses

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Species I	claims 1-2, 6-10
Species II	claims 1, 3-7, and 11
Species III	claims 1, 7 and 12

The following claim(s) are generic: 1 and 7.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: species I has constant phase, species II has phase that changes, species III has two streams.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leslie Pascal whose telephone number is 703-305-4922. The examiner can normally be reached on Monday, Friday 6:30-5:00.
